

Post 16 Catch Up Support

The College aims to provide additional support for 16 to 19 students in English, maths, and other courses where learning has been disrupted arising from Covid 19. Students will be supported primarily by bespoke Departmental interventions where identified students work in small groups with class teachers in addition to their normal lessons.

Departments bid for funding to cover staffing, holiday or Saturday morning intervention, use of PPA for 'in College' support during the day, paid lunchtime and after College sessions, intervention tutor support and additional online resources.

Additional third party service provider support such as online tutoring is also considered where appropriate. Individual student learning support in the form of one to one tuition for disadvantaged students and students with an EHCP is also considered where students have experienced addition disruption to learning due to Covid 19.

Students who require additional Maths and English support and/or students who have significant learning gaps as a result of disruption to learning arising from Covid 19 are eligible for the provision. This includes students with Special Educational Needs and Disabilities (SEND).
